Day4 Energy Announces the Successful Completion of Two Major Photovoltaic (PV) Projects in Germany

- *A 1.8MW PV power plant located in Niedereschach-Fischbach and a 715kW PV power plant in Zimmern, Germany*
- *Both projects were constructed in just 6 weeks, representing a significant achievement that demonstrates the project construction and management capabilities of Day4 Energy*

Burnaby, BC, July 13th, 2010 - Day4 Energy Inc. (TSX: DFE), a leading global provider of solar photovoltaic products and solutions, today announced it has completed the construction of two turnkey, ground-mounted photovoltaic power plants in Germany totaling over 2.5MW.

Built for a repeat customer of Day4 Energy, the 1.8MW Solarfarm Fischbach project in Niedereschach-Fischbach consists of 9,792 Day4 Energy 48 MC-S panels. Designed to produce enough power for over 500 households, this project will contribute to the reduction of approximately 1,170 tons of carbon-dioxide annually.

The second project recently completed was a 715kW installation built for Kreissparkasse Rottweil, a local savings bank in Germany. Comprising 3,920 Day4 Energy 48MC-S panels, the Energiepark Zimmern will produce enough electrical power for 200 households and will yield an annual reduction of approximately 464 tons of carbon-dioxide.

“The successful completion of these two projects, in particular the fact that it took just six weeks from construction commencement to grid connection, confirms Day4 Energy’s outstanding project management expertise” noted George Rubin, President of Day4 Energy. “As we continue to develop and promote both our project management and turn-key manufacturing capabilities, Day4 Energy is establishing itself as a strong partner, and catalyst for the widespread adoption of solar photovoltaics in markets across the world” concluded Mr. Rubin.

Day4 Energy continues to grow its presence in the solar project market, and intends to scale its project development business model to markets outside of Germany, most notably Italy and Canada, in the coming year.
